

Telefonica Landline dial-up connection settings for the 24/7 Service

This step by step guide will help you setup a connection for the Telefonica Internet service. This guide was created using a Windows XP Home Edition PC and the following steps will be different within Windows Vista.

- I. From the **Start** menu, choose **Control Panel** or **Start > Settings > Control Panel**.
- II. Double click the **Network Connections** Icon
- III. Click the **Create a new connection** icon and then click **Next**
- IV. Select the option **Connect to the Internet** and click **Next**
- V. Select **Set up my connection manually** click **Next**
- VI. Select **Connect using a dial-up modem** and click **Next**
- VII. In the **ISP Name** box type; *TelefonicaNET* and click **Next**
- VIII. Now you will need to enter *908 20 00 25* in the **Telephone number** box and click **Next**
- IX. Now you will have a **Username** and **Password** box, if you enter the following information:

Username: *telefonicanet@telefonicanet*

Password: *telefonicanet*

Confirm Password: *telefonicanet*

Now click **Next**

- X. Select the box called **Add a shortcut to this connection to my desktop** and click **Finish**.
- XI. A dial up connection box should now appear, if not look in the **Network Connections** window and then double click it. Once you have the connection box up, click on **Properties**.
- XII. Click **Networking** on the top and the Select **Internet Protocol (TCP/IP)** and then click **Properties**
- XIII. Now you need to setup the DNS settings. To do this select **Use the following DNS Server addresses** and then fill in the following information in to the **Preferred DNS** and the **Alternative DNS** boxes

Preferred DNS: *194.224.52.36*

Alternative DNS: *194.224.52.37*

Click **OK** and then **OK** again

- XIV. The dial up box will appear again. Make sure you have the telephone line plugged into your modem and now you are ready to go. Click the **Dial** button and your computer will try and connect to the Telefonica Server.

*Telefonica have added new DNS services to help with the amount of traffic going over there network, if you have any problems connection try changing the DNS server to **80.58.61.250** and **80.58.61.254***
